SPRING' 15

EPOTEC
THE Proven Hi Build Pool Coating

Just how good is Epotec in commercial pools?

Just how good is Epotec in commercial pools?

This is a question we are often asked and as a result we have been looking at those pools coated with Epotec 5 plus years ago. Commercial pools, such as Olympic and Community Pools see a lot of usage, some of them are heated, so they are open all year, adding to the wear and tear that the Epotec has to contend with. Elevated temperatures (25 – 28 C) also impact on the performance of the Epotec.

We are pleased to let you see that Epotec stands the test of high usage and high wear, year in and year out, in commercial pools. These pools get way more use than

residential pools, so even for the home owner it's a comfort to know Epotec in their pool will last at least as long and usually much longer.

For all applications good surface preparation, correct application and well managed pool water chemistry will bring the results seen here.

Epotec, as with all high build epoxy coatings, very slowly wears away. It does not peel or delaminate. Thus it can be easily and economically recoated when the time comes, to give another extended life span.

The proof is here!

2010

2015

BONDI

Camden Memorial Pool

(an outer S W Sydney), was re constructed and coated with Epotec in late 2010, to provide along lasting coating. The pool is very popular as Camden has hot summers and many families call it their cool off "beach".

2015

Picton Pool an outdoor 50 Metre heated pool, South West of Sydney, is a summer pool and is widely used by the community. In Spring 2008 it was prepared and coated with Epotec. It's now 7 years old and is in great condition.

Warragamba 25 M outdoor heated pool, in the lower Blue Mountains (Sydney) serves the community and was coated in the Spring 2008 as well. Its performing as expected, and is quite shallow, meaning lots of foot traffic over the coated surface, creating higher wear and tear.

E G Whitlam Leisure Centre

Liverpool, in greater Sydney, has several pools including a heated outdoor Olympic pool which was resurfaced with Epotec in July 2007. It's now just over 8 years old and standing up well to very extensive use. There is some wear evident at the bottom of steps and in a few places on the shallow end. The rest of the pool, is still in excellent condition and can be expected to last another 2 seasons. A 10 plus year life in effect.

EPOTEC, THE Proven Hi Build Epoxy Pool (and Spa) Coating is available for your pool. Be it Fibreglass, Marblesheen, Pebblecrete or Concrete. EPOTEC will give it a new lease of life. A life that's long lasting, economic and attractive. We work with you, DIY, with your painter or an Approved Applicator for a great finish, every time. Warranty available.
