## Autumn' 14

**EPOTEC**  
THE Proven Hi Build Pool Coating

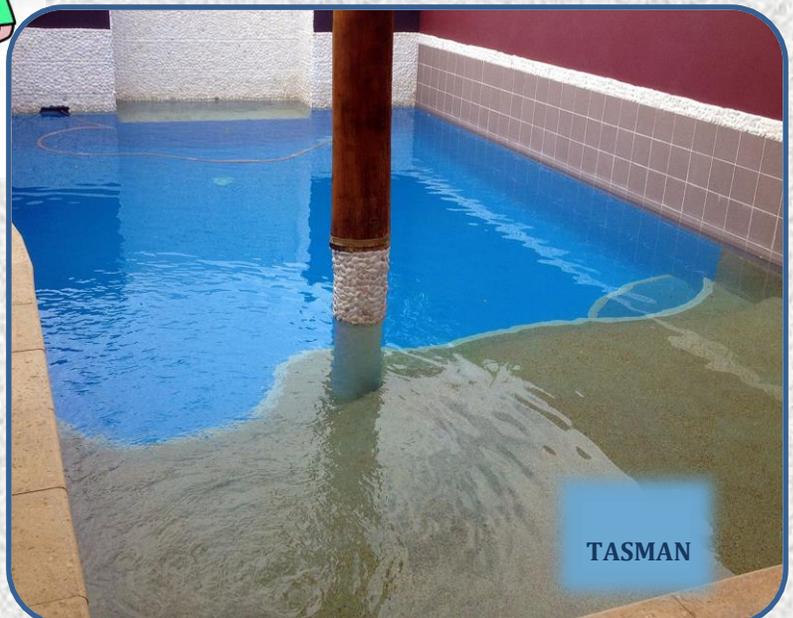

### Andrew's pool in Stirling. Perth.

This pool was in a poor state having been coated beforehand with Chlorinated Rubber pool paint. A coating that while very economical does not last for any length of time.

Perth Pool Paint (Robert Jackson and his team) were engaged to repair the surface and then apply a new longer lasting coating system. They chose Epotec, the proven pool coating. Robert used a high pressure water blaster to remove the existing chlorinated rubber paint. He then found many areas of drummy render which were dug out and repaired, prior to re coating. Some were 2.5 meters across and up to 25 mm deep.

There after the pool was sealed with Epotec WB (Water Based) Sealer after which coated with 2 coats of high build Epotec in colour Tasman. The end result speaks for itself. A great improvement and a long lasting asset.

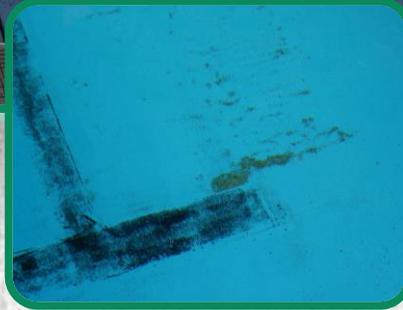

## A Lady's School Pool in Sydney, is updated.

Roseville College has a well-used 25 M pool and the School decided it was time to upgrade it to reflect the virtues of the college and provide a safe and hygienic finish to their pool.

Epotec in Bondi was chosen as the desired colour. As the pool is partly under a building, a light finish was preferred too. The team of contractors who carried out the work needed to repair random cracks, replace the control joints and tidy up the water line tiles.

The final result brings an attractive finish to a well-loved and used pool, which will see many years of use ahead.

EPOTEC, THE Proven Hi Build Epoxy Pool (and Spa) Coating is available for your pool. Be it Fibreglass, Marblesheen, Pebblecrete or Concrete. EPOTEC will give it a new lease of life. A life that's long lasting, economic and attractive. We work with you, DIY, with your painter or an Approved Applicator for a great finish, every time. Warranty available.
