EPOTEC
The Proven Pool Coating

The all NEW EPOTEC NT (New Technology)

With all manufactured products they need upgrades every now and then to take advantage of new technology, new ideas and better production techniques. Epotec HB is no exception and after 25 plus years of faithful and proven performance an upgrade was decided.

After 4 years of rigorous work in the lab and in the field, Epotec NT (New Technology) was ready to be launched.

Epotec NT takes advantage of the improved chemistry now available and better satisfies the demands and needs of the pool owner in many ways. This includes more tolerance to weather when curing, improved colour retention, greater film build when needed and easier mixing and application. Epotec NT has been used already in pools and monitored closely. Excellent results from the field, supported all the lab work.

Applying the first coat of Epotec NT Tasman over a previously coated and prepared epoxy

Beautiful deep intense blue, first coat. Fantastic opacity and coverage.

Dark Blue (Tasman)

At the steps when finished you can see the graduation in colour as the depth increases.

The finished pool and showing the great colour Tasman offers, more so when the pool is in light and shaded areas.

Epotec NT, has distinct improvements and thus makes it more user friendly for both DIY and Contractor alike. The most useful being a bigger pack size than before meaning less mixing time, and the fact its ready to use immediately, with no waiting for induction.

Application is still just as easy, be it brush or roller, and with no thinners the smell is hardly noticeable.

Epotec NT flows out nicely and can be used to fill indentations and depressions as you go, giving a much smoother surface, tile like.

As you can see even in one coat its coverage is impressive blanking out the colour underneath, though you still need 2 coats for maximum benefits and life. The intense pigmentation is a big enhancement too, providing richer and more intense colour now and into the future.

Epotec NT has the same excellent value for money that the earlier formulation enjoyed, another important factor too.

We believe Epotec NT will be the pool coating you have been looking for and can use in your pool with confidence and with the satisfaction of an attractive, easy clean pool, season after season.

Here the exposed concrete surface is being patch primed with Concrete WB Sealer, prior to first colour coat.

The look after just the first coat.
Impressive!

Tasman (Dark Blue)

Finished with Epotec NT Tasman. Ready to enjoy.

A lovely pool in a semi tropical location with Epotec NT, with a 50/50 blend of Tasman and Royal Blue.

EPOTEC, THE Proven Epoxy Pool (and Spa) Coating is available for your pool. Be it Fibreglass, Marblesheen, Pebblecrete or Concrete. EPOTEC will give it a new lease of life. A life that's long lasting, economic and attractive. We work with you, DIY, with your painter or an Approved Applicator for a great finish, every time. Warranty available.
